

# THE REAL FACTS ON THE BAYOU BRIDGE PIPELINE

**WE BELIEVE IN ENVIRONMENTAL STEWARDSHIP**

The real facts on the Bayou Bridge Pipeline are being misrepresented by a small number of those who don't want you to know the truth. Here's the truth about the Bayou Bridge Pipeline.

## ENVIRONMENTAL STEWARDSHIP

One of our core values as a company is environmental stewardship—not only because it is good business, but because it is the right thing to do. When planning a pipeline, our highly skilled engineers, environmental scientists, wild life biologists and geologists design our pipelines to follow the safest routes with the least environmental impact.

## ATCHAFALAYA BASIN

We are committed to the long-term viability of the Atchafalaya Basin. We will take extra care by using specialized construction techniques and restoring all areas we cross to preserve the Basin's flow.

## EXISTING PIPELINE

We want to set the record straight about our existing pipelines that run through the Basin. The Florida Gas Transmission Pipelines were constructed starting in 1959 in accordance with all the appropriate rules and regulations. The pipelines continue to safely operate today, meeting all the applicable rules and regulations under which they are permitted.
